

ROPA Schedule 2023-2026

2023

April: Champlain new program review for Computer Science Educator

July: Goddard full program review (report is currently being reviewed by Goddard for any factual corrections and will be submitted to the Board in October for approval)

2024

March: TAP full program review

April: Norwich full program review

July: Vermont Technical College full program review

Fall: Castleton Principal review

2025

Spring: Champlain full program review

Summer: Peer Review full program review

Fall: UVM, Middlebury, Saint Michael's full program reviews

2026

Fall: Castleton full program review (Note: with the merger with NVU, this may be changed. NVU would have been due for their review in 2027)

Besides the reviews that are already on the schedule, there will likely be some new program reviews. The Board will receive applications for those reviews if any are submitted. I have heard that Middlebury may be applying for approval for their graduate-level language program, and Norwich may be applying for approval for Health Education. There may be others as well.
