

VSBPE

Date: January 10, 2023

Item: Champlain College Math Programs Two-Year Report

ITEM: Shall the VSBPE approve of Champlain College's Two-Year Report for their secondary and middle grades math programs and grant continued full approval until their next ROPA review in 2024?

AGENCY RECOMMENDED ACTION:

That the VSBPE approve of Champlain College's Two-Year Report for their secondary and middle grades math programs and grant continued full approval until their next ROPA review in 2024, pending receipt of the \$500 Two-Year Report fee.

BACKGROUND:

Champlain College had a ROPA review of its new math secondary and middle grades program in 2020 and was granted full approval pending satisfactory completion of a Two-Year Report in 2022. The report was submitted and reviewed by the AOE ROPA Coordinator and found to contain satisfactory evidence of meeting the concerns in the ROPA report from 2020.

Normally, this would lead to full approval for five years, until the next ROPA review in the 7-year cycle. However, since many of the Champlain programs are integrated, it makes the most sense to review the math education programs in 2024 during Champlain's full ROPA review, so that the ROPA schedule will be aligned for all programs (with the exception of the proposed new Computer Science Education program which is being reviewed in April 2023).
