

## Assessment Calculations

### Measurement:

- A. Per instructions from the US Department of Education's Office of Special Education Programs (OSEP), Vermont did not report on this portion of the Indicator for the 2014-2015 School Year. The guidance from OSEP was that the Every Student Succeeds Act (ESSA) made AYP Determinations inapplicable for this year. The calculation used in previous years for this section follows:

AYP percent = [(# of districts with a disability subgroup that meets the State's minimum "n" size that meet the State's AYP targets for the disability subgroup) divided by the (total # of districts that have a disability subgroup that meets the State's minimum "n" size)] times 100. The minimum number of students required for this calculation is 40. Only the 15 school districts which are also Supervisory Unions are reported here; the remaining Supervisory Unions show NA, for Not Applicable. The SUs reported include Battenkill Valley, Blue Mountain, Burlington, Colchester, Essex Town, Hartford, Milton, Montpelier, Rutland City, Norwich, Rivendell, St Johnsbury, South Burlington, Springfield and Winooski.

- B. Participation rate percent = [(# of children with IEPs participating in the assessment) divided by the (total # of children with IEPs enrolled during the testing window, calculated separately for reading and math)]. The participation rate is based on all children with IEPs, including both children with IEPs enrolled for a full academic year and those not enrolled for a full academic year.
- C. Proficiency rate percent = ((# of children with IEPs enrolled for a full academic year scoring at or above proficient) divided by the (total # of children with IEPs enrolled for a full academic year, calculated separately for reading and math)].
