

To whom it may concern:

I feel strongly that whatever Standards are adopted in VT include language about ethnic groups that have been historically subject to persecution or genocide. Specifically and crucially, it is imperative that the curriculum addresses antisemitism, a form of bias and hatred that is unfortunately increasing in our country. This was the language that the Legislature included as section B of the definition and section B was eliminated.

Please feel free to contact me if you have any questions about this.
