

Shared School District Data Management System (SSDDMS) Sandbox

Instructions

We are pleased to announce that Vermont now has access to the eFinancePLUS Sandbox environment. This will allow a preview of the off the shelf eFinancePLUS product. Keep in mind that this is a Vermont-specific implementation and that all features of the Vermont contract may not be reflected here. Differences include the Vermont-specific uniform chart of accounts and other standardized aspects of the system. However, the sandbox will give you a good idea for the feel of the software and its capabilities.

Sandbox Requirements

For SUs/SDs that have already signed an End User Agreement (EUA):

Please email our Team at aoe.ssddms@vermont.gov with your name(s), your email address, and the name of your Supervisory Union and/or your School District. After we verify having a signed EUA on file, we will send you the instructions and login credentials required.

For SUs/SDs that have not yet signed an EUA:

Please have the Superintendent of your SU/SD sign and return a Non-Disclosure Agreement (NDA). Together or separately from the NDA, please email us at aoe.ssddms@vermont.gov with your name(s), your email address, and the name of your Supervisory Union and/or your School District having completed the NDA. Once we have confirmed having a completed NDA on file, we will send you the instructions and login credentials required.

Sandbox Questions and Technical Support

Once using the Sandbox environment, if you encounter an issue or come up with a question, please contact the project team aoe.ssddms@vermont.gov.

Thank you,

SSDDMS Project Team
